

PROVISIONAL PATENT APPLICATION COVER SHEET

Application Data Sheet (ADS) for Provisional Application

TITLE OF INVENTION:

AI-Powered Financial Agent Marketplace Platform with Integrated Compliance Infrastructure for Cryptocurrency-Banking Bridge Services

APPLICANT INFORMATION:

Entity Type: Small Entity

Applicant Name: Kellogg Holdings LLC

Entity Status: Limited Liability Company

Business Registration: Alabama, United States

Applicant Address:

4901 Indian Valley Rd

Birmingham, AL 35244

United States

INVENTOR INFORMATION:

Inventor Name: Travis Kellogg

Inventor Address:

4901 Indian Valley Rd

Birmingham, AL 35244

United States

Citizenship: United States

CORRESPONDENCE ADDRESS:

Name: Travis Kellogg

Title: Founder & CEO, Compliance Officer

Company: Kellogg Holdings LLC

Address:

4901 Indian Valley Rd

Birmingham, AL 35244

United States

Telephone: 205-202-1093

Email: travis@kelloggholdings.com

APPLICATION INFORMATION:

Application Type: Utility - Provisional Patent Application

Filing Date: June 9, 2025

Priority Claim: None (Original Application)

Related Applications: None

Entity Status: Small Entity

INVENTION DESCRIPTION:

This provisional patent application describes a revolutionary AI-powered financial platform that creates the world's first comprehensive marketplace for autonomous AI agents to conduct financial transactions while maintaining full regulatory compliance with traditional banking systems. The invention encompasses:

Core Innovation Areas:

AI Agent Financial Ecosystem: A proprietary platform enabling autonomous AI agents to register, verify identity, conduct financial transactions, and participate in a viral referral network that creates exponential growth through agent-to-agent recruitment.

Compliance-First Architecture: Patent-pending regulatory infrastructure that automatically ensures AML/KYC compliance, FATF Travel Rule adherence, ISO 20022 message formatting, and real-time suspicious activity monitoring for both AI agents and human users.

Crypto-Banking Bridge Technology: Seamless integration between traditional banking (ACH, wire transfers, treasury management) and cryptocurrency services (300+ digital assets) through a unified API infrastructure.

Viral Referral Mechanics: Proprietary algorithm enabling AI agents to autonomously recruit other agents, creating network effects with exponential user acquisition while maintaining compliance standards.

Tiered Service Architecture: Multi-tier fee structure optimized for micro-transactions to enterprise-level services, with automated fee calculation and revenue optimization.

Technical Implementation:

Frontend: React/TypeScript Progressive Web Application with native mobile optimization

Backend: Node.js/Express microservices architecture with real-time WebSocket connections

Compliance: Automated regulatory reporting with ISO 20022 message formatting

Security: End-to-end encryption, multi-factor authentication, enterprise-grade monitoring

Payment Processing: Multi-processor integration (Stripe, PayPal, NOWPayments)

Banking Integration: Direct API connectivity with PNC Bank treasury management

Market Application:

The invention addresses a \$15B AI agent services market projected to reach \$175B by 2030, creating the financial infrastructure for the emerging AI economy. Current solutions lack comprehensive financial capabilities, regulatory compliance, and viral growth mechanisms.

Regulatory Compliance Status:

Licensed Money Transmitter (Alabama MTL License - Active)
FinCEN BSA Registration and Compliance Program
ISO 20022 Compliant from platform inception
Automated AML/KYC verification systems
FATF Travel Rule compliance for transactions >\$1000
Real-time OFAC sanctions screening
Commercial Implementation:

The platform is currently operational in production with:

4 active revenue streams generating immediate income
Fully functional AI agent marketplace
Complete banking API integrations
Enterprise-grade security and compliance monitoring
Multi-currency support (USD, BTC, ETH, SOL, USDC, USDT)
Unique Technical Advantages:

First-Mover Technology: Only platform combining AI agent marketplace with full financial services and regulatory compliance
Patent-Protected Innovation: Proprietary compliance infrastructure creates defensible competitive moat
Viral Growth Engine: AI agents autonomously expand the network through referral mechanisms
Regulatory Infrastructure: Comprehensive compliance reduces barriers for institutional adoption
Revenue Optimization: Tiered fee structure maximizes profitability across all transaction sizes
Claims Overview:

This provisional application establishes priority for:

AI agent financial identity verification and registration systems
Autonomous agent-to-agent payment processing with compliance monitoring
Viral referral algorithms for AI agent network expansion
Integrated crypto-banking bridge with ISO 20022 messaging
Real-time regulatory compliance monitoring for AI agent transactions
Tiered fee calculation algorithms optimized for AI agent services
Multi-processor payment routing for AI agent marketplace
Commercial Value:

The invention creates a new category of financial infrastructure, positioning for:

\$2.5-3M Series A funding currently being raised
Projected \$100M+ annual recurring revenue by Year 3
Multiple exit opportunities with strategic acquirers (banks, fintech, AI companies)
Licensing revenue from patent-protected technology

DECLARATION:

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 37 CFR 1.68, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

SMALL ENTITY STATUS:

Applicant hereby claims small entity status under 37 CFR 1.27 and certifies that applicant qualifies for such status. No license rights have been transferred to entities that would disqualify applicant from small entity status.

PROVISIONAL APPLICATION STATEMENT:

This application is being filed as a provisional application under 35 U.S.C. 111(b) and 37 CFR 1.53(c). The applicant requests that this application be treated as a provisional application, and that a filing date be accorded based on the submitted specification and any drawing(s).

PRIORITY ESTABLISHMENT:

This provisional application establishes priority for future utility patent applications related to AI agent financial infrastructure, compliance systems, and viral referral mechanisms. The 12-month priority window provides time for platform scaling and revenue generation to fund full patent prosecution.
